| 0095-000109-00 | 4 Channel Chilli 24 retrofit Relay Card (Not including PSU - used for second and subsequent cards in the same Chilli rack) |

OVERVIEW

Control the power for Moving Lights, LED's, scrollers and other non-dim loads using the new Chilli 4 channel relay card for Chilli 24 units.

This retrofit relay card for Chilli 24 dimmers enables new and existing users to add relays in place of regular dimmers where power switching is required. The 4 channel relay card has been introduced in response to customer requests to control more non dim channels. It is ideal for both existing and new installations with the relay card being placed in any of the 6 possible locations in the dimmer rack. So now your switched loads can also be brought under DMX control from the same dimmer rack.

The new relay card simply replaces an existing 4 channel dimmer card in a neat retrofit swap out solution. Up to 6 of the 4 channel relay cards may be fitted to any Chilli 24 unit in a one for one swap with any of the 4 channel dimming cards - now relay loads can be placed on any phase or channel location as necessary.

Chilli 24 relay cards are rated at 10A or 16A per circuit depending upon the Chilli 24 model.
